**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. Claims 26 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 26, the recitation "the address" and "the first source register" lack proper antecedent basis. Further, the recitation "a next minuend operand" is indefinite since claim 15 does not recite any minuend operand.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 14, 15-17 and 28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McIntyre et al. (5,422,805).

As per claim 1 and 15, McIntyre et al. discloses in figure 1 circuit for processing instructions including a multiplication instruction (see col.6, lines 66-67). The instruction processing including fetching and decoding a multiplication operation instruction (21,22), executing the multiplication operation instruction (30) on a source operand (from 25) to generate a square of the operand (see TABLE 1), and storing the result in a target accumulator (in 25) inherently specified by the instruction as claimed.

As per claims 2,3,16 and 17, McIntyre et al. also discloses the instruction processing circuit based on RISC architecture (see col. 3, lines 64-65), and teaches the arithmetic (30) including an ALU (34) besides the multiplier (33) for performing other operations including subtraction (see col.6, lines 66-67) during an execution of a multiplication operation instruction.

As per claims 14 and 28 McIntyre et al. also discloses an accumulator status flag (the control signal of mux 38).

4. Claims 4-13 and 18-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D Ngo whose telephone number is (703) 305-9764. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki can be reached on (703) 309-9662. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
